Professional Summary

Recent graduate looking to start a career in tech. Eager to learn new things, grow, and work with a great team. Quick learner who wants to gain experience, build skills, and make a positive impact in a fast, creative environment.

Education

Bachelor of Technology, Computer Science Engineering 2021 – 2025
Nalanda Institute of Technology, Bhubaneswar, Odisha, India **CGPA: 6.9**

Technologies

Programming Languages: JavaScript, Java
Front-End: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
State Management: Context API, Redux Toolkit
Back-End: Node.js, Middleware
Databases: MySQL, MongoDB

Projects

Movie OTT Platform

Tech Stack: HTML , CSS , JavaScript , React.js , Context API, Tailwind CSS

- Created a simple React OTT platform where users can browse movies, view movie details, and add them to a watchlist. Used Context API for managing data and fetched movie information using APIs. Added easy navigation with React Router and made the UI fully responsive for a smooth and user-friendly streaming experience.

Parking Slot Simulator Booking: (React.js, Node.js, MongoDB, REST APIs, Cookies)

- Developed a parking slot simulator using the MERN stack, showing real-time slot availability with booking and cancellation options. Built APIs for updating slot states and added an admin panel to manually toggle slots. Designed a clean React interface that displays each slot in a live grid with smooth updates.

Portfolio Website: (HTML5, CSS3, JavaScript, React.js, Tailwind CSS)

- Made a personal portfolio website to show my projects, skills, and achievements. Used React and Tailwind to create a clean, mobile-friendly design with easy navigation and well-organized content.

Certifications and Achievements

- **Mern Full Stack Web Development:** Internship course at QSpiders

Extracurricular Activities

- **Saraswati Shishu Vidya Mandir :** Won first place at the state-level science exhibition.
